🌐 <https://github.com/bakeji>

I am a skilled Frontend Developer who enjoys creating attractive, user-friendly websites using HTML, CSS, JavaScript, and React. With a keen eye for design, I build responsive and user-friendly interfaces. My focus is on delivering dynamic and efficient frontend solutions that surpass expectations.

Projects

IP Address Tracker

The IP Address Tracker app is a solution to the IP Address Tracker challenge provided by Frontend Mentor. It fetches geo-location and network information based on the user's input IP address or their current IP address.

Quizzical

This is a quiz application built with React. It fetches a set of quiz questions from an API, allows the user to select answers, checks the answers, and displays the score.

Rock Paper And Scissors

This is a simple Rock Paper Scissors game created as a challenge from Frontend Mentor. The game is built using React, and it allows the player to play against the computer by choosing one of the three options: Rock, Paper, or Scissors.
